

Matthew Cheston Malesky

product & engineering

Passionate technology generalist with deep experience in large scale datacenters and applications. Most enthusiastic when working in efficient, effective, and creative organizations to deliver innovative, well-designed products in growing market segments.

Currently looking for new opportunities in datacenter infrastructure, artificial intelligence and machine learning, and other emerging technology sectors.

vmware

Technical Support Engineer

May 2011 to May 2012

- Support staff member for VMware vSphere product line, a set of products designed to provide virtualized computing infrastructure management in large-scale datacenters.

SOLIDFIRE

Technical Marketing Engineer

June 2012 to May 2015

- Developed a reference architecture for OpenStack clouds built using the SolidFire data storage system.
- Led a certification effort for inter-operating the SolidFire data storage system with Cisco Unified Computing System.
- Produced customer demos, automation scripts, and other technical marketing collateral.

Product Manager

May 2015 to February 2016

- Introduced a Java software development kit for the SolidFire storage system API.
- Developed requirements for a new command-line interface toolkit.

fhwl.

Released July 2018 on the iOS App Store

- Developed, shipped, and marketed an iOS 11 app.
- Used tools including Xcode 11, Swift 4, IAP with Stripe and Apple Pay, and Facebook Advertising and Login.

NetApp

Product Manager

February 2016 to January 2017

- Managed ecosystem products within the NetApp/SolidFire product portfolio.
- Expanded SolidFire SDK products to include .NET, Python, and Java language coverage.
- Worked with software engineering teams to update the SolidFire VMware vCenter plugin to support standalone installations without an additional application server.

AUTOMOX

Product Manager

April 2018 to February 2019

- Provided technical onboarding for the first service provider customer.
- Created integrations for customers to add automated software patching to their own product portfolios.

FACTION

Product Manager

June 2019 to October 2020

- Launched Cloud Control Volumes multi-cloud attached data storage product lines.
- Integrated two additional partner data storage platforms into the product portfolio.
- Created a multi-tenant storage offering for smaller footprint storage configurations and expanded self-service capabilities.
- Collectively added over 100 different data storage configurations to the portfolio.
- Created product collateral for a large partner and channel ecosystem.

f5

Product Marketing Lead

October 2020 to June 2021

- Developed competitive analyses and product positioning for Aspen Mesh.
- Migrated document collateral into Wordpress-based website and knowledge center for better search performance and customer experience.
